Question 1:
The conference represented an excellent overall learning experience

Total Responses: 189   **Overall Average:** 4.66

Answer	# Responses	Percentage
Strongly Agree	133	70.4%
Agree	52	27.5%
No Opinion	1	0.5%
Disagree	2	1.1%
Strongly Disagree	1	0.5%

Question 2:
The content covered in this conference was useful and relevant to my scope or practice and job

Total Responses: 189   **Overall Average:** 4.65

Answer	# Responses	Percentage
Strongly Agree	131	69.3%
Agree	54	28.6%
No Opinion	1	0.5%
Disagree	2	1.1%
Strongly Disagree	1	0.5%

Question 3:
The conference content addressed one or more educational gaps in my knowledge, competence and/or performance

Total Responses: 189   **Overall Average:** 4.59

Answer	# Responses	Percentage
Strongly Agree	123	65.1%
Agree	60	31.7%
No Opinion	2	1.1%
Disagree	3	1.6%
Strongly Disagree	1	0.5%

Question 4:

Will you make changes in your practice/performance as a result of attending the AHME Institute this year?

Total Responses: 189   **Overall Average:** 1.05

Answer	# Responses	Percentage
Yes	179	94.7%
No	10	5.3%

Question 5:

Please tell us what new strategies or changes you plan to make:

Total Responses: 93   **Overall Average:** n/a

Answer
improve coordinator wellness, coordinator professional development ideas and I've made notes of ideas for impacting behavioral changes (for myself, PDs and trainees).
Enhance our resident involvement is safety and quality initiatives, incident reporting, root cause analyses, etc. Develop milestones for Program Coordinator/Staff at my institution. Introduce the concept of Associate DIO at our institution. Introduce assessment and evaluation of resident executive functioning skill for development and improvement.
finance, program valuation
Review my block scheduled again to make sure it complies with accepting PGY 2 residencies. As well, we need to diversify our types of scholarly activity.
I'm a new (less than 6 months) Program Coordinator and new to GME so attending "The Power is Yours: Using Milestones for Program Coordinator Development" was beneficial. This presentation is helped guide me and will communicate with my manager and PD so they can understand how they can be a resource for my growth (personally and professionally).
Na
Use the Clinician Educator Milestones to help direct our Faculty Development.
looking to attach the EI to our didatics

Learning about using social media as a way to help with interview season as well as alumni connections was very helpful. I hope to utilize a better social media presence for my program in the future using the tools I've gained in these sessions.

Focus more on well being of coordinators and self.

Structuring of milestones.

Focus on systematic efforts out of GME office to support program function

I am planning on creating a program coordinator timeline for our programs. I also want to create resources and checklist for the program coordinators to use throughout the academic year.

More self-wellness activities and look for ways to further my career path

We have alot of changes to make to our GMEC make up and processes.

Normalizing the impact of COVID on Learners

social media changes

We hope to develop more meaningful support and motivation for faculty scholarship, which will then hopefully increase scholarship opportunities for GME and UME students. Development of well-being curriculum that can be implemented through didactics. Expanded professional development as a program coordinator, even in UME.

Better CLER preparation, implementation of new ideas (passport) into orientation.

A whole bunch! Including: new QIPS educational efforts, new wellness initiatives with residents and faculty, working with residents to create better posters, improving our institutional and residency programs at recruiting more diverse residents and faculty, using the new Clinician Educator Milestones to guide our faculty development efforts, using more media in our faculty development efforts, better discussing resident ACGME Survey prep (in advance of the survey) and results review (after results return), helping prepare my new TY PD replacement, etc.

Upgrade my evaluation forms for the resident evaluations to start

I learned a lot about site visits and implementation of well being policies/curricula.

Standardize handling of residents in crisis Develop a GME book club Program Coordinator milestones Teaching Faculty milestones

#1 is integrating GME funding curriculum into the first three resident meetings this upcoming academic year. They don't have to become experts, but they do need to have some frame of reference of how things work to help better understand that we can't just "do" everything they "want".

A lot of great resources! I won't list them all here but did in the specific evaluations.

I plan to review all the handouts, during my planning time to continue coming up with new strategies on how to do my work effectively. During coordinator meetings, I will pass along the information gained to come up with new ideas on how to be more efficient. I plan to look into possibly using jotform to distribute forms out to my residents since it seems like the preferred site to use, and I've never looked into it. I thoroughly enjoyed the interactive trivia games and might look into using that without residents to make a more fun environment.

Find better ways to track oversight of GMEC activities. Develop a more formal PD onboarding processess to assess the quality of the transition from the prior PD to the new PD.

Will get working on ILP's.

Maintaining personal wellness; looking into TAGME certification; what is my career trajectory; networking and finding mentor(s)

Enriching faculty development curriculum. Tightening up our agenda, goals and practices for our PEC and CCCs. Incorporating year round work on our APE. Compassion, teamwork, and education with and through our GMEC.

Discuss with the Program Director on how to be more efficient with ADS.

I am currently working on the development of a curriculum for program coordinator at my institution and several of the sessions provided great insight on what has worked for other institutions. This will help me to adapt this suggestions to our institutions circumstances and availability of resources.

.

RE-evaluation of our GME minute template

too many to count here

schedule and block diagram; wellness integrated in to meetings; documenting errors to avoid citations

Have many new resources and plans to share with leadership and propose for our institution, the biggest being the Program Coordinator Milestone program.

I will definitely implement some of the wellness plans and bring them back to the committee. Changes will be made to our orientation sessions as well.

NA

na

I am going to make changes to my annual program evaluation odcument

Too many to list. Great resources provided.

1-incorporate efforts toward 'teaming' 2-share more faculty development resources among programs of different types 3-incroporate more curricular elements around error disclosure 4-make better use of on line resources in fac dev presentations

incorporate well resources; revitalize evaluations using competency mapping

After having a site visit, I will definitely start changing our list of wellness activates and the wellness time we give our fellows is very crucial. I will also try and ask for help when needed. Coordinators can NOT do it all.

I enjoyed the content and hope to improve my research skills and administrative skills.

Will utilize the WELL toolkit

WE ARE JUST STARTING OUR RESIDENCY PROGRAM SO A LOT OF THIS INFORMATION WILL BE HELPFUL

Review of our APE process and implement changes. Re-organize site visit preparation.

Learn about the new subject matters I learned about while attending AHME Institute 2022.

we will use several of the resources shared!

Working on a curriculum for DEI and wellnes,

The use of PEC minute template and carrying over information from PEC/APE meeting to Webads, focus on better wellness for myself, develop and focus on a more robust career path for myself, get involved with COPAC (never new it existed), introduce clinician educator milestones to PD and core faculty, hope to convince recruitment team to use the Harvard implicit bias test each year for all participants in our interview season and especially those that review applications in order to tweak our "holistic" interview screening process - hope to develop that process even better to assist with diversity within our program. I have a lot of ideas I learned from this conference that I would like to share with my PD and faculty and hopefully implement some of them, too. I hope to re-instate our book club at our institution with the coordinators and make it more robust. I also think this would be a good idea to do with residents during didactics time where they have assigned articles on a specific topic (wellness, etc.) or assigned chapters out of books and have them do this, too, on different topics that are important to residents and/or their work.

I will go back and review all slides and material to see what areas we can work on.

I learned a lot of ways to improve my professional development!

I am not directly involved in planning, but will pass along some ideas gained in the Institute.

Joining a committee to focus on PC well being

To be more thoughtful regarding my role and the roles of others. Strive for excellence. Be involved and passionate about what I do.

Self-assessment using coordinator milestones

Curriculum design changes and utilizing many of the tools to improve educational content of programs

Liked some of the wellness ideas, book club, and milestones for PCs

New incites to APE

Plan to incorporate the WELL Toolkit into our wellness curriculum and programmatic offerings, to determine if book club for leadership is an area of interest for our team, and to use a number of the suggestions from building and sustaining a program of scholarly activity in our dept.

There are a number of new strategies that I plan to implement as a result of this conference. Thank you for sharing all of these fantastic best practices and ideas!

I'm planning on presenting an synopsis of the sessions that I attended to my DIO and see what we can implement here.

I plan to keep the resources provided on hand for my referral. I plan to make recommendations to my GME on program administrator career development workshops.

Enhance our Faculty Development plans, provide resources to my Program Directors to improve Fellows overall Well-Being and educational experience, both in policy and in practice. This was my 1st AHME Institute and I am so very pleased with all that I've learned! I look forward to attending the conference in person next spring. Thank you!

We will be changing some of our rotations for residents as outlined in one session. In addition our GMEC structure is changing.

Treat myself as well as I treat my friend. Serve and support myself as well as I serve and support my team members.

Hope to encourage our institution to focus on coordinator well-being and create a purposeful wellness program to better support our trainees and faculty. Plan to encourage our department to implement faculty teaching assessment program and offer remediation those competencies that require growth. This conference served as a refresher of how crucial the coordinator role is and how I can further develop and invest in my professional growth. It was an amazing and insightful conference!

interagration of ps and GEM

Better teaching/instruction with learners and faculty -

Be more compassionate

PC Milestones Lifestyle Medicine Books to read

So many new resources and strategies to use!

TY rules keep changing so helpful to have a refresher

Enhancements to professional wellness for the Program Manager

Many things, but mostly to ensure more integration of GME best practices into the clinical learning environment, the hospital's processes and systems. And continued education of all facility and GME stakeholders on a regular basis.

So many good ideas to percolate on for future implementation!

Looking to improve our site visit preparation process, as well as perform new PD reviews.

Incorporate many of the strategies and ideas that were presented by the speakers.

Great relevant topics with not just standard but best practices

I recently transitioned from a GME role to a program specific role and took away many new tools to use in that role.

all are noted in my conference evaluations

Network more with AHME members to gain more of an understanding about what other organizations are doing that is an innovative practice for their GME Office. Hire a Research Administrator/Coordinator Take a closer look at how schedules re impacting the budget bottom line. Could we do better?

1. Ensure residents get feedback for the RLs that they report - have high expectations for RL reviewers 2. Have QI resident rep present at our TYRP business meetings 3. Create a workshop on Abstract to Poster for my residents 4. Facilitate engagement of my residents with the community we serve by having them do a community project that gets them involved directly with the people of our community 5. Develop faculty goals for mentoring scholarly activity 6. Use the milestones for clinician educator to guide my professional development 7. Ask DIO to un-blind my applications so that I can do holistic review of applications for URiM and/or look for more human capital to help me holistically review all my applications 8. Have the WHO PFA guide for field workers available for use when I have a resident experience a life crisis 9. Create a disclosure & apology after unanticipated outcomes in patients workshop for my residents 10. Use the WELL Toolkit to improve my wellness curriculum and to gain skills in appreciative inquiry

More structured social media plan Poster examples/workshop for residents and fellows

More lectures for a coordinator

Wellness resources will be used to enhance our existing process.

Take care of myself to avoid burnout and be a "voice" and more involved

incorporate lessons learned

I have a better knowledge now regarding GMEC and ACGME.

Pertaining to new ACGME rules and ways to educate residents.

96 empty responses

Question 6:

What gaps in your knowledge, competence, and/or performance did the Institute address (i.e., knowledge gap in NAS)?

Total Responses: 174   **Overall Average:** n/a

Answer
DEI, New ACGME common program requirements
NA
I have and will continue to share tips and best practices gleaned from Institute sessions with other leaders at my institution. We have already started using ideas from a presentation on social media as well as one on the value of GME.
Role of the DIO
I really enjoyed the session on behavioral changes and the sessions on coordinators.
New tools programs are using that are being used for wellness, and streamline at the GME level for ADS updates. Update on CLER. Seeing different structures pro and cons that helped me understand that I was not alone in my thought process, but learning new pros and cons and the same time. I appreciated the items on assisting new program directors, uplifting coordinators and items for resident wellness.
Gaps in knowledge of career pathways was for administrators in GME., particularly the concept of an Associate DIO.
dgme, ime

All the complexities of the NEW ACGME requirements and how to also use current strategies

Recently transitioned from a Program Coordinator to and Institutional Coordinator. The sessions provided filled many gaps

ACGME policy

As Above

Coordinator wellness, ACGME requirements

Ton Nasca's presentation was very interesting. The topics in general provided at least some new knowledge

knowledge gaps in overall GME funding and financing, coordinator professional development pathways and opportunities

The Institute address A LOT since I'm a new (less than 6 months) Program Coordinator and new to GME.

it is always helpful, for me, to learn more/different/new tricks/tips in time management. i'm always trying to perfect what i do & how i do it.

Accreditation

Na

Self -Compassion!

help me learn the value of our GMEC

The COPAC bootcamp helped me realize sections of my knowledge I need to work on to better assist with running my dept's residency program.

Milestones and how to link and implement the into the program.

GMEc funding!

Clinician educator milestones

Program coordinator resources, APE, CLER, and CCC.

Finance and CMS Milestones are being created to evaluate faculty and residency coordinators

Knowledge gap in GMEC oversight responsibilities

GME Finance is always a great topic for me.

Program Director Milestones Evolutions

some wellness and social media items were most interesting

how to encourage meaningful support and motivation for faculty scholarship, which will then hopefully increase scholarship opportunities for GME and UME students

Knowledge, Professionalism, Communication, Systems, and in Practice-Based Learning and Improvement areas.

I am a new coordinator - everything I heard is new

na

Understanding how to oversee the APE process better and having a Housestaff Council

I learned a lot about site visits and implementation of well being policies/curricula.

ECFMG Program Valuation

The most helpful presentations, for me, are those that teach you something rather than those that are more geared towards "here's what I did". I'll go back to the GME Funding: Nuts and Bolts - I know very little about that piece and was most excited about that session and it turned out to be the most valuable. Very motivated to throw myself into more learning.

GME finance - always a headache, incorporating different strategies into programs - wellness, workshops, etc

Wellbeing, Committees

na's

NA

I did have some gaps in knowledge in better understanding of transitioning into the milestones 2.0 and being able to relay those changes to my faculty, and evaluators.

I will utilize several of the handouts to improve current processes.

Knowledge gap in ACGME reviews; milestones

I appreciate all of the thoughts and efforts that went into all of the sessions. I always learn something new and relevant.

Looking more into program evaluations; resident council; well being requirement

As a new program coordinator not only did I learn a lot, I also found resources to continue my development.

Na

CLER Requirements

This my first year dealing with onboarding and it was extremely helpful learning from seasoned veterans

finance

NA

Our biggest gap is with our present approach to APE and how we need to improve. We also can work with local hospitals for our QI projects more effectively.

This was my first time attending this conference and did not know what to expect. I am very happy I did. I will meet with my Director because there is a lot where I am not involved in here and I want to be part of.

Refresher on ADS documentation and citations.

definitely brings into light where there are room for improvements with regards to my role, the program and overall help in focusing on things that may help my program.

I liked the updates on ACGME matters and ECFMG. Also was very interested on the Clinician Educators Milestones, which is something that our program has to work on.

.

GMEC funding CLER updates Option to address compassion fatigue

lots. Pt safety and Quality and how to integrate into training program activities

GME funding knowledge; executive function skills as an identifier in resident issues; TY specific policies as I am new to the TY program

NA

I enjoyed hearing best practices from programs on a variety of topics. I always find AHME to be a great resource for practical application of GME topics and requirements.

Enhanced and informed knowledge of coordinator development, wellness programs/resources, COPAC as a whole.

Addressing Motivation in GME

GME funding

Wellbeing

Unfortunately I think I am WAY too early in my trajectory to benefit from pretty much anything offered this time around - I am 3 1/2 months into a fellowship administration career, and most if not all of the sessions were geared toward someone who has a clue or at least some experience in the cycle. I would have like to have more clarity, more "dumbed-down" speak so that someone like myself who is adrift in the sea of acronyms can follow along better but I understand the need to address a wider range of participants. I think I just chose poorly for my first alphabet-soup conference - I really need something for a NEW new person. In other words, I am leaving with all my knowledge/competence/performance gaps still well in place through no fault of yours.

na

yes, it filled in the TY updates

self-compassion, ACGME related things, resources

CLER Update was helpful

best practices for acgme prep for a site visit was insightful

1-teaming 2-incorporation of on line resources into fac dev 3-enhanced understanding of scholarly activity 4-writing more effective surveys 5-targeting poster and abstract presentations around a central scientific question

evaluations, TY specific requirements, wellness teaching

NA

I have only been in my role for 18 months so this has helped immensely!

The overall role of the program coordinator

I always learn new skills when i attend.

I am a fairly new PC and the sessions that I attended really closed the gaps of my overall role and duties and gave a better insight into Milestones, APE and evaluations

Need to have a better wellness plan

WE ARE JUST STARTING OUR RESIDENCY PROGRAM SO A LOT OF THIS INFORMATION WILL BE HELPFUL

NA

GME Finance, resident/fellow mentorship, faculty development, GME aspect of APE and WebAds review

Well-being

site visits

Career development

APE and ADS

I think AHME does a good job in diving deeper into subjects I know about but don't have a strong grasp. Becoming more familiar with policies around DEI, wellness and resilience, burnout and suicide prevention, and improving scholarly activity infrastructure is extremely helpful. And overall, I appreciate how institutions really focus on trying to "QI" a specific target or shortcoming at their program. I hope to be able to give back to this community as I become more familiar in my roles.

The newest ACGME requirements

milestones 2.0

How to go about improving DEI in my programs

Expanded my knowledge of CCC and PEC requirements, along with ECFMG. The Bootcamps provided excellent information for Program Administrators. Gained useful knowledge regarding Social Media. Information

dealing with how to work with residents experiencing difficult issues and incorporating more compassion was very enlightening.

Hoping to take the coordinator milestones example and look at those to see where I fit it and what I need to improve on. I hope the knowledge I learned from the different APE sessions will be able to assist me in a smoother PEC to APE to Web Ads data drop, instead of feeling like we are recreating the wheel each time it comes time for one of those.

Love hearing the job sharing with the GME community, can always learn from others and grow.

GME Financing

I'd like to see more technical skill workshops!

Financing/reporting, wellness opportunities, GMEC structure.

Holistic application review

NA

NA

Updates in ECFMG

I don't think I can say it addressed gaps for me as a coordinator. I am 1-1/2 years into my role, so very much still in the learning phase, so an overall knowledge gap of not having multiple year of experience.

Career advancement options for coordinators/managers, ACGME/CLER updates,

Important info for new DIO!

Knowledge gap in creative time management, wellness endeavors

Gaps in knowledge in new accreditation requirements, expanded knowledge of current requirements, competence in new wellbeing teaching techniques and executive functioning analysis, new ideas to improve my teaching skills

.

Not many sessions felt relevant to coordinators -my expectation was a conference completely targeting us.

Provided great insight, ideas, and new tools that can be utilized in a residency training program

CLER and Milestones for Faculty

competence gap in wellness curricular planning, knowledge gap for faculty development utilizing book/podcast clubs, knowledge/competence gaps for promoting involvement in scholarly activity.

Concepts such as: self-compassion, emotional intelligence, resilience and motivation, faculty development, and program coordinator training

NST

Milestones 2.0

GME funding was very informative.

The GME funding session was great refresher presentation.

Various strategies related to the leadership of the GME enterprise at our institution.

ECFMG and PC Milestones were the most interesting topics this year.

Talks on Updates to Licensure exams, ECFMG and Clinical Educator Milestones added to my knowledge

I sent an individualized learning plan to incoming interns. I shared the executive functioning slides to other program directors/APD's. Review of requirements and ADS program and RC along with ACGME and CLER are all so helpful.

I am new to GME therefore all of the presentations I attended to provided me with a clear knowledge to what GME really is and how I can incorporate it to my program.

I realized opportunities for improvement in my APE process as well as my method of responding to trainees in crisis; with more focus on having the necessary resources available.

I think Dr. Nascar's discussion about the state of learning during these past few years of the pandemic was particularly memorable. All of the speakers were wonderful and in the end, I truly feel a sense of community and that we are not in this alone. Those sentiments were echoed again and again during each of the four days of the AHME Institute.

NA

CLER GMEC structure Assessing TY readiness for next step.

Identified areas of improvement and knowledge in CLE, Milestones 2.0, GME funding, ECGME and my own well-being.

Gaps addresses was understanding the ACGME well-being initiative and how milestones can be applied to coordinator and faculty role and growth. The ACGME update demonstrated the broader context of where GME is and the direction it needs go.

GMEC oversight information, GME funding, APE and ADS connection - importance of standardizing forms for these items that GME has oversight.

ECFMG changes

How to have scholarship through medical education

na

Wellness resources, updated CPRs, house staff organizing..

It actually gave me the opportunity to reaffirm my knowledge.

NA

There are a lot of tools and resources available so that we don't need to reinvent the wheel. Received some great information I am bringing back.

Milestones becoming more robust for not only the resident, but faculty and coordinator/manager.

Milestone requirements ACGME requirements

Always interested to see how others satisfy ACGME requirements and gained some tips to improve upon our current processes.

Some of the finer points around GME funding, ways to integrate some reasonable and not too burdensome best practices to meet professional/faculty development requirements, scholarly activity, QI in patient care, and wellness.

Site visit preparation and how to get my physicians ready Self Compassion not something I had thought about or how it might effect me but definitely something to look into and apply

New coordinator information/wellness

pitfalls in accreditation, ability to innovate around details

Question 7:

Please indicate your job responsibilities:

Total Responses: 180   **Overall Average:** 2.22

Answer	# Responses	Percentage
UME	2	1.1%
GME	158	87.8%
CME	1	0.6%
TY	17	9.4%
Faculty Development	2	1.1%

Question 8:

Please list topics you would like to see in future AHME Institutes:

Total Responses: 72   **Overall Average:** n/a

Answer
More from teams who directly support GME (engaging faculty, simulation, UME/GME relationships, etc.).
Development of new programs; strategies for successful completion of an ACGME New Program Application.
No specific recommendation
I would like to continue to see topics catered to GME staff who are new (less than 3 years), see GME staff who came from other fields such as Student Affairs, Education, used their transferrable skills to be successful in their role, and navigating difficult PD and/or faculty as a Program Coordinator.
PEC/CCC agenda Conflict Management Ownership
I enjoyed the session on social media. I would like to see information about the success of remote interview season versus in person and if remote is a viable future option to retain to cut costs post COVID.
ACGME site visits, Milesstones, tracking program requirements
TAGME resources
More information on career paths and development in GME Certifications such as CTAGME etc.
More information on specific training for creating a safe learning environment

UME staff/coordinators resources --- certifications (like TAGME?) or any UME-geared/focused workshops, groups, webinars, etc? How to be sure you're integrating UME learners -- especially 3rd and 4th year clinical students -- into GME supports like evaluations, faculty scholarship, resident scholarship, etc

Boot Camp for coordinators who aren't new

More info about site visits, milestones, etc.

Personally, as someone beginning my journey to a Master's Degree, I would highly value sessions on what that looks like. Which programs did they attend; online vs. in-person; what courses made up the program; work/life/school balance; WHICH master's degree to go for etc..

GME finance, ECFMG, wellness, onboarding for residents

The 'how to" part of running committees, agenda setting, etc

Having a successful interview season, with the upcoming changes having PASS/ FAIL scores. Questions to ask interviewees from a coordinator's prospective.

More on PD and coordinator succession planning. Best practices on new institutional and common requirement changes - engaging members outside of the GME Office

Whatever is new and fresh and upcoming.

Didactic curriculum development.

101 basics for new programs

more workshops focused on program coordinator roles, playing a part in the program, career opportunities

Program Administrators/Coordinators challenges and bias faced due to scope of job. How did The Great Resignation of 2021 impacted GME programs internationally and what can an institution do have better retention of the program administrators.

More on patient safety activities and education Resident leadership training

more specifics on assisting our residents as teachers

GME Office Burnout Topics related to hybrid work schedules

I would love to see more about the Program Coordinator Milestone program - updates on their data as well as just more time to ask questions.

How about a short course geared toward those of us that have less than a year under our belts? Get us past the absolute terror and imposter syndrome that plagues those of us slogging through all the tasks and problems in a calendar that we don't understand yet?

na

More on milestone implementation How to maximize the offerings of your residency management system

Answer	# Responses	Percentage
Excellent	134	74.9%
Very Good	33	18.4%
Good	12	6.7%
Fair	0	0%
Poor	0	0%

Question 18:

If you experienced difficulties in any of the above areas, please briefly explain here:

Total Responses: 129   **Overall Average:** n/a

Answer

Blurry slides during several presentations

The broadcast quality was poor at times and it was very difficult to rewind to watch parts I had missed. I wish there was more time between sessions as there often wasn't time to refill coffee, grab lunch, or use the restroom.

NA

Minor image issues (blurry or frozen)

no technical issues

Would have like to have video of presentations available

Our hospital firewalls are very strict so much of the data on the screen wouldn't load due to pop-up blockers etc. The Bootcamp sessions were too rushed. The presenters had good content but tried to make it interactive with games which took all the time so they rushed or didn't finish their presentations.

There were moments when I could access the slides but not the videos.

na

no difficulties

There were some sessions where the presentation would lag or not play at all. It was recommended that we use a certain browser, but this did not always resolve the issue.

I had to refresh my browser a couple of times during some sessions but I think it was due to my connection.

the issue ended up being my institutions firewall, which caused me to miss all of tuesday & the first presentation on wednesday.

NA

Na

NA

NA

No difficulties encountered.

I did experience some technical issues and had to use my cell phone for the majority of the conference. Browser would freeze.

na

I did not experience any difficulty. I think it was easy to navigate throughout the different sessions.

NA

na

NA

no difficulties

NA

EVERYTHING WORKED GREAT

My ONLY complaint is that there was a significant delay from when Chat questions got submitted and when the speakers received them. Twice I entered questions but the speakers said "apparently there are no questions so we'll finish early"

NA

na

The conference was rather long. 4 full days virtually is alot.

Not a platform specific problem, but my hospital's network wasn't compatible with the streaming. I used my personal computer or phone instead. It worked great otherwise.

It was hard to get in initially but otherwise worked well

a couple slides came in fuzzy at first and we couldn't read live during the presentation but they were available after the presentation.

n/a - i did not experience any difficulties

NA

The meeting length was very long for a virtual meeting (long days + 4 days long).

NA

NA

NA

While I liked the way the virtual conference was set up, I think a more formal "Lunch break" would have been nice. I had to quick grab a lunch and miss some of the Q & A sessions.

Na

NA

NA

NA

No difficulties. Thank you.

na

I did not experienced any difficulties. At first a little bit with the audio but as soon as I refreshed the page, as instructed, the problem was immediately corrected.

.

no difficulties

Shared screens were always blurry; top banner, side question banner, and bottom banner were clear

NA

NA

NA

None, although I think more built-in breaks would have helped (although I appreciated having so many sessions)

na

I had buffering and extreme lag in every single session, and I was advised that nobody else was reporting the issue (which I know to not be true) so it was probably a network issue on my end. As I notice patterns, this always happened at the beginning of every session as people were entering, so it's a network problem - but not on my end. I monitor my network closely and troubleshoot with multiple tools, all reporting excellent speeds, connectivity, and traffic. There were issues with the clarity of the screen for the PPTs looking extremely blurry, so in cases where the PDFs had not been provided that presented a problem following along and reading any materials. I checked again an hour ago and there are still missing slide decks for some of the talks, so having that ahead of time is important (or at least by the end of the day of the talk). I ran many CME conferences, so I know the difficulty of obtaining the decks in enough time to get them uploaded and in the hands of your participants.

na

NA

The images on the screen were often very blurry and I couldn't read content on the slides. Not sure if it was my internet connection or something else. My colleague who also attended this conference experienced the same issue as me.

No difficulties experienced.

NA

NA

na

Accessing sessions was a little difficult to figure out at first

na

Some of the modules could have been a little longer.

na

NA

The slides were in and out fuzzy. I was able to still follow along, but I thought it was a strange thing to have happen.

NA

The only technical difficulties I experienced were audio issues during one session.

I have a huge issue with how long the conference days are. It is an improvement from last year but 6 hours of lectures is too much. Ideally 4 and 5 max. After four hours of anything virtual, my brain is fried.

I clicked on a session for evaluation which I did not attend but the system did not allow me to take it back.

na

No issues

NA

NA

No difficulties at all

NA

No difficulties experienced

NA

NA

This was one of the better virtual experiences I have had.

nonen/a

.

First time virtual conference attendee. Didn't know what to expect nor how to proceed accessing the conference. Nothing clear in the registration nor on website.

5 minute breaks in between sessions were helpful to run to the bathroom however no true lunch break made it difficult to take a real break.

NA

Registration would have been facilitated by having an electronic form rather than a form that needed to be printed, filled out, then faxed or scanned/emailed back in.

For a virtual meeting I found the overall length of the conference to be long, but hopefully next year the conference will be in-person which will eliminate "sitting in front of monitor" factor.

NA

At times the presenter slides became fuzzy. Happened on different devices at different locations.

No difficulties. Needed a long lunch break

Buffering at times a bit distracting when trying to read slides. But overall not bad

No difficulties experienced.

NA

Audio was issue for certain speakers. Test and instruct all speakers devices used during presentation or panel discussion.

No issues experienced

xcb

na

NA

Some issues with sound breaking up - overall OK, but I still hate virtual conferences despite your best efforts to make this easy for me (which it was, except for sitting in one place for hours at a time!)

The presentations kept getting blurry and then would clear up. I dont like that you cant go and watch all of the presentations. There were a few that were at the same time. I was able to go back and watch some but not all. Would have liked to have been able to watch Fridays Holistic View but it was not available. Also you had to really want to watch one and scan through to find it.

None.

NA

NA

My video kept going out. It was frustrating.

NA

NA

na

x

No problems at all

While it was wonderful to have so many sessions available, with few breaks in between this made for a very long day in front of the computer. Hopefully we'll be able to be back in person next year, which will be helpful, however if virtual again at any point, consider more breaks throughout the day.

no issues

NA

N/A. I did not have any technical difficulties. The website and sessions were super easy to navigate. Thanks so much for a seamless virtual conference!

No difficulties everything went smoothly

No difficulties.

I would like to see an easier way to pay and get a receipt for conference registration. Perhaps an on-line portal would facilitate this process. I also had difficulty uploading my presentation. While there was an abundance of communication, I did not realize I would be live to answer questions after my recording. I though I would only monitor the chat.

NA

Occasionally I lost connection and would have to reconnect and then I would miss a minute or two.

NA

Second day the audio went in/out for two sessions...but it happens

NA

No difficulties. Good platform. Easy to use.

No difficulties

Our Institution IT department did not support the conference. We all used our own personal computers.

na

60 empty responses

Future Institutes

Question 19:

Other than topics, please indicate any ideas for improvements that you would like to see made in future Institutes:

Total Responses: 48   **Overall Average:** n/a

Answer

Access to recorded presentations for viewing again later.

Would like to see recording of sessions available

In person - can't wait!

Would of liked to have options to take multiple sessions either in the form of an on demand type of tool. I was split on attending coordinator topics versus TY topics. There were questions and answers outside of the presentation slides that I would have liked to review.

I really enjoyed the interactive activities/polls/ feedback sessions

Sometimes slides/pdfs of a session would need to be asked for during the session, or uploaded to the platform after the session ended. As someone with an auditory processing disorder that needs visual support to understand a speaker, this was sometimes frustrating. Ensuring that pdfs of session presentations, or at least an outline, are provided PRIOR to the start of a session would be highly appreciated.

Meet In Person!!!!!!!!!!!!!!!!!!

Go back to in-person! Looking forward to that for next year. AHME Institute is great virtually, but it's even better in person!

HUGS! Can't wait to get back to in-person conferences!

Coordinator bootcamp needs to be less games and more real talk and suggestions. The kahoot took too much time.

Have the videos able to replay again.

If you do another virtual meeting, please plan more time for breaks in the day. The days were very long. Some Ask the Expert sessions felt very rushed and compressed and encourage all speakers to have a video component to their presentation rather than audio only.

NA

would like to not have parallel sessions or have different tracts with options to watch sessions we can't attend live

Concrete ideas to review for the C-TAGME.

bring back to face-to-face

A virtual platform in addition to in person would be nice for those with accessibility issues

It would be great if we could have access to the recordings of the sessions available.

Plan better for network activity based on your registration numbers, and have network managers live to monitor traffic?

na

Please return to in-person events. Too many distractions and interruptions while trying to attend in the office.

'Residents working in interprofessional teams'

3 days (slightly longer) would be preferred over 4

I hope the institute returns to an in person event. It is nice to have the virtual option.

possibly a farewell note? I felt like the conference ended abruptly

The Boot Camp for new coordinators was nice, but maybe some type of "boot camp" sessions for seasoned coordinators as well. Also, scholarly activity for coordinators. I'm very interested in doing poster, abstracts, articles, anything but have no clue where to start

Recordings available afterward. An easier way to save PDF's - maybe all in one place or maybe a zip file somewhere that we could copy and save to our computers.

Hopefully in person :)

I honestly thought it was great! I can't wait to come back next year!

Live job board/something on name badges that indicate Hiring, Looking for Work, Open to Opportunities, ect.

Larger breaks in between some sessions -after 2-3 hours

NA

Please continue the committee and region mixers. These would make for excellent networking opportunities in-person.

NA

Not sure.

back to in person.

Welcome both in-person and virtual options.

Well-being Resilience

more breaks

Have all talks available for viewing during the conference.

Enjoyed everything, felt fulfilled post Institute.

Add more games as learning strategies.

In-person again, please! Doing this virtually allowed too many distractions.

x

More networking opportunities

Engage members in a round table based upon their GME structures rather than just regional: University oversight, Corporate w/ multiple Community Hospitals, Single Community Hospital.

In person :o)

Have meeting be both in person and virtual for "coordinator education fund"

141 empty responses

Question 20:

Please list three cities that you would like ALPD to consider for future conferences:

Total Responses: 103		**Overall Average:** n/a

Answer

Indianapolis

Grand Rapids, MI Madison, WI Indianapolis, IN

Colorado Arizona Utah

San Diego, CA

Santa Fe, New Mexico Austin, TX Tucson, AZ

Myrtle Beach or Charleston, SC Boston, MA Chicago, IL

Nashville Atlanta Chicago

Nashville, San Diego, Baltimore

Chicago, IL Phoenix, AZ Los Angeles, LA

Austin, Las Vegas, Charleston

Nashville, TN. Memphis, TN. Knoxville, TN.

San Antonio, TX Houston, TX Austin, TX

NA

Louisville KY

San Francisco, California Portland, Oregon Seattle, Washington

Anywhere warm

Charlotte, NC Raleigh, NC Wilmington, NC

Portland, OR Chicago Denver, CO

Atlanta Orlando Cincinnati

Louisville, Santa Fe, Indianapolis. Places off the usual beaten path for conferences. Too many conferences go to Boston, DC, Orlando, New Orleans.

Atlanta Tampa Denver

Boston, San Diego, Chicago

Jacksonville, FL Orlando, FL Tampa, FL

Fort lauderdale, FL Los Angeles, California Orlando, FL

San Diego, CA Fort Lauderdale, FL Savannah/Charleston area

Las Vegas, Miami, New Orleans

Boston, Seattle, and Colorado

Orlando; San Diego; Atlanta

Honolulu. San Diego. Boston.

would keep virtual option as well.

Orlando New York Nashville

Columbus, OH Denver, CO Orlando, FL

San francisco San diego Charleston

Orlando, Kansas City, Nashville

Phoenix Boston Savannah Bonus City: Charleston

San Antonio, TX Kansas City, MO San Diego, CA

Minneapolis, Kansas City, Phoenix

na

Chicago Boston Seattle HAWAII lol jk

Chicago New York Santa Barbara

Chicago Boston New orleans

Detroit, Michigan; Lansing, Michigan; Grand Rapids, Michigan

Nashville, TN Savannah, GA New Orleans, LA

San Antonio Phoenix San Diego

Portland OR (was so excited for this year until it went back to virtual!), seattle, san diego

New York Washington California

Nashville, TN Dallas, TX Kansas City, KS

Boston Seattle Portland, OR

Atlanta, California and Texas

Orlando, FL Myrtle Beach, SC Phoenix, AZ

West Coast or East Coast cities. Maybe Boston, Portland, Seattle, New York, or Chicago. Cities at are easy to fly into with nice sites to see. Or Phoenix or Scottsdale too!

DC Virginia Florida

minnieapolis, seattle,

Denver Boston Las Vegas

Chicago, Denver, Washington DC

Las Vegas, NV Boston. MA Philadelphia, PA

Orlando, Florida Las Vegas, Nevada Nashville, TN

Nashville San Diego Chicago

Boston, MA Worcester, MA San Francisco, CA

Biloxi, MS... Columbus, OH... Virginia Beach, VA...

Orlando, Savannah, New York Lets be in person next time!

San Diego Dallas Florida

New York City Miami New Orleans

Chicago, Seattle, Somewhere in New England

New York City, NY; St. Augustine, FL; Charleston, SC

Santa Barbara, Ca Monterey, Ca Ojai, Ca

Santa Fe Las Vegas Seattle Charlotte

San Diego, Las Vegas and San Francisco

Chicago, Illinois Charleston, South Carolina Orange Beach, Alabama

Washington DC New Orleans Seattle

Gulfport, Mississippi Buffalo, NY Phoenix, AZ

New York Dallas San Diego

San Diego Nashville Orlando San Antonio Seattle Portland

Boston Chicago San Fran

San Diego Las Vegas Portland

Seattle, Charleston, Miami.

Portland Chicago Anywhere that respects the rights of women and underrepresented individuals. I am very concerned about a conference in Texas next year.

Denver, CO Nashville, TN A Culture/Nature Center or University, Hawaii Island

Any cities in California!

Phoenix, AZ Scottsdale, AZ Tucson, AZ Salt Lake City, UT Boise, ID

Chicago

Portland, Oregon Portland, Maine Little Rock, Arkansas

Orlando, San Diego, New Orleans

Tucson San Diego Santa Fe

San Diego Portland Anywhere closer to the west coast

Orlando, FL Allentown, Pa Syracuse, NY

Florida Arizona South Carolina

1. Portland, OR 2. San Francisco, CA 3. Charleston, SC

x

Charleston Seattle Phoenix

Washington, DC Nashville, TN Orlando, FL

Portland, Oregon Seattle, Washington New Orleans, Louisiana

Chicago, Nashville

Los Angles Hawaii Arizona

Indianapolis, IN Madison, WI Denver, CO

Nashville Memphis Atlanta Salt Lake City Boston

Tampa Baltimore Chicago

Detroit San Diego New Orleans

Denver, CO Washington DC Boston, MA

Cleveland, Columbus, Las Vegas

Charleston

Florida New York California Puerto Rico

Clinician educator certificate may be issued at the conclusion of AHME if certain cumulative number of hours is achieved.

Question 21:

Please provide any additional comments or suggestions:

Total Responses: 155   **Overall Average:** n/a

Answer

Very good. More time between sessions would have been helpful.

NA

Great session

As always - enjoyable and informative.

Amazing conference. Thank you.

My first time to attend AHME Institute. Overall, was a great conference!

in person !!

Great Program overall

Continue to offer a virtual format, please!

na

I thought the content was relevant with a good selection of topics. It was very well organizaed and the breaks between sessions was very helpful to continued engagement with the conference

This was my first AHME Institute and I had a blast! Thanks to everyone involved for putting together an excellent program.

Please continue having a virtual conference since funding to attend the conference might not be covered by the job but from personal funds. If there will be a virtual conference again, I would ask for to state on the website that the "ask the speakers" sessions would be on zoom and if there is an expectation to show your camera or not. There were some sessions/mixers were it felt forced to turn on the camera or leave the room due to the number of attendees (less than 10). I would ask for the moderators in the "ask the speakers" to bring questions since the attendees was small but there wasn't a lot of questions that was asked from the attendees. I enjoyed the presentations were recorded. Also, I wish for the slides to be uploaded prior to the session and I say this because I was trying to determine which presentation to go to and I based it on the objectives and the presentation as well. I was hoping to see in the "people" section for a way for me to get to look up attendees who are in the same role and/or specialty for me to connect with. There wasn't a way that I was aware for me to reach out to people besides the presenters/moderators due to their role. Perhaps there can be a mixer for next time?

hopefully we neve have to do this virtually again but one note is the sound quality. two presenters voices were very low, might have been far from their microphones, that it was hard to hear them. i think all other issues, lagging, were probably my institution.

The format was great this year. Thank you for all of your hard work!

Na

Thank you!

NA

Overall I feel there was far to much time spent on wellness topic. I felt like this topic could've be coverage in 1-2 sessions rather than over 4 days.

NA

very well done presentations and virtual platform.

Overall very informative conference.

Continue to employ virtual format in the future

Thank you for a great conference

I am excited to go in person next year to have a different experience.

did not need to use technical support so I am unsure about Cadmium tech support

This experience was as good as a virtual conference could be!

NA

Can future conferences be a mix of in-person and virtual broadcast, to increase inclusion for those of us that have trouble traveling long distances for conferences, but want to be part of sessions and the important professional development they provide?

n /a

Very well done overall. Keep up the good work!

I would like to continue to learn as I grow. I know that I can join Boot Camp each year because topics will change yearly.

na

I thought the conference was great. It would be nice if it was shorter. 4 days is a long time for a virtual conference.

NA

This was my first Institute - very impressed. I got more out of this conference than I did ACGME this year. Thanks for all of the great information!

My favorite conference!!! Excellent job all around. Thank you.

Nice conference

Thanks!

Further instructions in regards to obtaining the CME credits would be more helpful.

it was a great conference. Great topics and speakers....but I miss seeing everyone. I am really hoping for an in-person event next year.

Really miss being in person. Too distracting being home; you tend to listen a little and work some. Hard to immerse yourself in the conference.

Overall excellent conference! First time attendee and I really enjoyed it!

Great conference, look forward to next year!

Na

NA

NA

NA

Thank you for all of your hard work. I will continue to integrate what I have learned from the conference into my RD and GMEC.

Thank you for the experience. I cannot wait for next year in person hopefully.

None.

EVerything was good as usual. Great topics and discussions. Very insightful

While having the opportunity to travel to assist to the conferences sounds great, I would like that the AHME Institute would still have virtual sessions so program administrators who are not provided with resources to pay for the fees would have more chances to participate without having to cover travel expenses and other fees out of their pocket.

.

Good conference - nice range of topics

Second time attending and I always learn a lot!!

NA

NA

Keep doing a great job!

The ACGME virtual conference did VTT transcripts for all the recorded sessions and added it to the slide decks; having something like that would have been beneficial. Also some slide decks were missing from sessions.

na

I will try again later in my career (probably after I have at least one year experience) in order to garner more benefit from your offering next time. In the meantime I will be searching for options for PAs like me - under a year

na

I am looking forward to an inperson event. I thought that this year the program was spread out over too many days compared to last year

Thank you!

Please return to in-person events.

great conference

Congratulations to the ALPD and to the AHME staff for another highly refined Institute filled with timely and practical information. It is not easy to run such a meeting on a virtual platform--yet this was done with admirable aplomb. The interlinks with Zoom were flawless and the Cadmium platform delivered a performance which can only be described as superb. The timing on the sessions was really good and the strategic interposition of the 'ask the experts' sessions was a strong idea. I think AHME/ALPD delivered a lot of value for the $300-ish price.

na

Great Conference! I always look forward to the AHME conference!

Overall a good conference. Appreciate the opportunity to view missed sessions or re-view sessions.

I think this is a great organization. Thank you for all that you do

Thanks for a great conference. It would be nice for the recordings of each session be available for 2 weeks after. There were sessions that I would have liked to attend but could not.

NA

This was a wonderful conference! Thank you for making things so easy and accessible for all in these challenging times!

I really like how the councils are individualized towards one's job classification. I am considering applying for the associate membership for COPAC.

na

NA

the Ask the Experts session was valuable - you might think about how to keep that session when in-person!!!!

I want to attend an in-person conference and I want shorter days. I also like Harvard CME's virtual platform and it allows attendees to interact more with the speaker and audience.

It is heavily geared to program administrators and staff. Little more for PD's would be nice.

na

Looking forward to seeing everyone in person next year!

NA

Loved the AHME Conference. Kudos to Sandi Parson and others who made this a great success this year! The music played during the "downtime" between one session and another was relaxing and made me feel like I was having some "wellness" time.

Great meeting, so hard while at work to attend each session virtually but very grateful that all slides and materials are available to download after. Loved the networking sessions after the sessions this year - that was a great add on with small audiences able to have in depth conversations on topics that we of of interest to them.

Very much enjoyed the conference. Lots of info to digest.

I really liked this platform that was used to host the conference! Everything ran smoothly!

Wonderful virtual conference experience, thank you!

First time attending this conference and will not be the last.

NA

In-person!

Good information presented.

Can't wait for this to be in-person again! The virtual platform is really great, but in-person conferences are so much better!

.

Thank you for the hard work to organize this great virtual experience!

no comments great conference so valuable

.

Good talks! I liked the evaluation platform and access to sides/additional information.

Thank you for a Great Conference

Great conference! I hope to attend in-person next year.

Great planning with just the right amount of time going into each day's sessions, especially since it was virtual.

Excellent conference!!! Keep up the great work!

NA

Great conference, thank you!

None.

Very good experience.

NA

Thanks for a great conference

This is an excellent conference with practical suggestions to maintain accreditation and make programs understand new developments such as advances in TY program work to improve patients safety, team work and a better educational experience.

Overall Amazing job! I cant wait for next year!

Thank you to all who devoted their time to planning and coordinating AHME Institute 2022. It was a success!

This was my 1st time attending AHME Institute and I found the content to be more relevant to my job than any other national conference that I've attended previously. I will certainly recommend the conference to my colleagues, and look forward to attending AHME Institute in 2023!

NA

No additional comments or suggestions

Great conference which offered topics had not considered but glad I joined because I learned so much! While I would appreciate to travel to conferences I enjoy the virtual option because though my department allows me travel, my family obligations prohibit me from traveling so many days so hope that you would consider offering hybrid version so those unable to go in-person can still benefit from your conference.

traewqer

I am a first time attendee. Good conference, thank you!

Great conference, could use some breaks

Overall,, the conference went well, despite my general lack of enthusiasm for virtual conferences. I had to come home to watch these sessions, because If I stayed in the office I would have never gotten to watch, due to a merry-go-round of visitors to my office.

Great speakers and topics. Always love this conference and it gets me fired up about starting new processes. Thank you.

None.

NA

This is a GREAT conference, with really great presentations, but four days maybe be too long.

Really liked the "Ask the Expert Sessions." That was very helpful to a meaningful Q&A.

na

NA

NA

na

x

Thoroughly enjoyed the conference

Thanks for an excellent conference venue with really important and pertinent GME topics and speakers. Well done!

NA

Excellent session and learned from each.

Great meeting...thank you.

Great conference

Great job overall! Thank you.

This was my first AHME institute and I found the participants friendly and the content informative. I really liked the meet the experts sessions.

I have none at this time.

This was a amazing conference!!

This is my first time attending the AHME conference. It is fantastic with much of useful information for professional and personal development. Thank you.

Overall great presentations.

First experience as a new member of AHME and found it very well organized/orchestrated and nice variety of workshops were offered. Very good learning experience.

the 5 min break between sessions was not sufficient to get coffee, use the restroom and/or get food for lunch especially as there was no scheduled lunch break - I think 10 min would have been much better

Great conference! Thanks AHME staff!

Excellent conference...thank you!

Na

NA

All virtual conferences do not have real interactions between participants. It would be nice to incorporate break out rooms, or Q&A being more interactive. It would hold people's interest longer and is a big part of what is missing from the in person experience. Hopefully it won't be an issue next year.

Great conference.

AHME Institute topic presentation choices and speakers were excellent this year.

Truly enjoy the conference. Feel refreshed and took away many ideas

Thank you

Very good conferences and resources!

We can design future AhME institute based on shared vulnerabilities per ACGME residents survey.
