EMPOWERING YOUR LEARNERS

USING A COACH APPROACH TO FOSTER PERSONAL AND PROFESSIONAL GROWTH

REGISTER NOW

OBJECTIVES

- Distinguish coaching from mentoring, advising, and sponsoring as you apply it to learner development.
- Apply core coaching principles—including active listening, open-ended questioning, reframing, and accountability—to real-world learner scenarios in clinical education.
- Identify and explore contradictions between learners' stated values, goals, and behaviors in ways that invite reflection, ownership, and growth rather than defensiveness.
- Engage in coaching strategies tailored to learners' readiness, context, and developmental needs, supporting professional identity formation and sustainable growth.

ABOUT THE SPEAKER

NICOLE PIEMONTE, PHD
ASSOCIATE DEAN FOR FACULTY LEADERSHIP

Dr. Nicole Piemonte is a certified coach who works specifically with those who have chosen a life in healthcare. She has taught medical students, residents, and faculty clinicians for over a decade in her roles as a coach, professor, and associate dean for faculty leadership.
